

Drop-lights to the left show 6 on the image but there would be 12 per tree. These would be taken in and out each season. This could be considered sufficient WOW!

For additional WOW you could add 100m of spiralled glitter garland. The glitter garland above is shown in red, but it is suggested warm white. This could be done instead of, or in addition to the drop-lights, but the glitter garland is priced to leave in all year round, as is usual for dressed trees.
