

AGENDA 10, Enc x) Condition Ratings for Ashington Road, provided by NCC Highways

(Shared via email 12th June 2026)

The table below, which shows the condition ratings for the six Ashington wards. This is also visualised on the Vaisala map below.

As the data is derived from Scanner/CVI, which hopefully I explained in the meeting. There is no alternative visualisation available within that provides the same comparison. In addition to this we conduct Highways Safety inspections in line with our policy.

It is worth noting that the majority of roads shown in red are back lanes (as can be seen on the map). If these are excluded, the overall condition across the network is good and I would imagine a lot better than perceived.
