

AGENDA 14, Enc xii) Skate Park – People’s Park

To consider and agree that Council delegate to the Assets and Development Manager (ADM) to undertake a comprehensive feasibility study for a new skate park at People’s Park, including but not limited to:

- Identifying and evaluating potential site locations based on criteria such as size, accessibility, existing infrastructure, and compatibility with surrounding land uses.
- Light-touch seeking of necessary permissions.
- Developing conceptual design options and cost estimates for skate park, landscaping, lighting, and any supporting facilities.
- Researching any applicable external funding sources.
- Conducting community consultation for users’ input, to gauge interest levels, and determine preferred design features through surveys, meetings, and/or workshops.
- Preparing a final report to Council with recommendations on the preferred site location, design concept, estimated costs, funding strategies, procurement process and implementation timeline.

Following consideration of final report, and approval, the ADM will be granted authority to apply for external funding opportunities and engage necessary professional services within the approved operating budget. Progress updates to be provided to Council at key milestones.
